<thead>
<tr>
<th>(B) Basic Research Question</th>
<th>IN one sentence, define the key features of the research question</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>(B) Key paper(s)</th>
<th>ш Цена убедительности</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>(C) Motivation/Puzzle</th>
<th>IN one short paragraph (say a max of 100 words) capture the core academic motivation – which may include identifying a “puzzle” that you hope to resolve.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>(D) Idea?</th>
<th>Identify the “core” idea that drives the intellectual content of this research topic. If possible, articulate the central hypothesis(es). Identify the key dependent (“explained”) variable and the key test/independent (“explanatory”) variable(s). Is there any serious threat from endogeneity here? If so, what is the identification strategy? Is there a natural experiment or exogenous shock that can be exploited? Is there any theoretical “tension” that can be exploited?</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>(F) Data?</th>
<th>(1) What data do you propose to use? e.g. country/setting; Why? Unit of analysis? Individuals, firms, portfolios, industries, countries …? sample period; sampling interval? Daily, weekly, monthly, quarterly, annual, … Type of data: firm specific vs. industry vs. macro vs. …? (2) What sample size do you expect? Cross-sectionally? In Time-series/longitudinal?</th>
</tr>
</thead>
</table>
(3) Is it a panel dataset?
(4) Data Sources? Are the data commercially available? Any hand-collecting required? Are the data to be created based on your own survey instrument? Or by interviews? Timeframe? Research assistance needed? Funding/grants? Are they novel new data?
(5) Will there be any problem with missing data/observations? Database merge issues? Data manipulation/"cleansing" issues?
(6) Will your “test” variables exhibit adequate (“meaningful”) variation to give good power? Quality/reliability of data?
(7) Other data obstacles? E.g. external validity? construct validity?

(G) Tools?

(TWO) Two key questions

What’s New?
Is the novelty in the idea/data/tools? Which is the “driver”, and are the “passengers” likely to pull their weight? Is this “Mickey Mouse” [i.e. can you draw a simple Venn diagram to depict the novelty in your proposal?]

What’s New?

So What?
Why is it important to know the answer? How will major decisions/behaviour/activity etc be influenced by the outcome of this research?

One bottom line
One

Contribution?
What is the primary source of the contribution to the relevant research literature?

Other Considerations
Is Collaboration needed/desirable? – idea/data/tools? (either internal or external to your institution)

Target Journal(s)? Realistic? Sufficiently ambitious?

“Risk” assessment [“low” vs. “moderate” vs. “high”: “no result” risk; “competitor” risk (ie being beaten by a competitor); risk of “obsolescence”; other risks? Are there any serious challenge(s) that you face in executing this plan? What are they? Are they related to the Idea? The Data? The Tools? Are there ethical considerations? Ethics clearance?

Is the scope appropriate? Not too narrow, not too broad.
